LPKF to Showcase Best-Selling PCB Milling Machine at MILCOM 2012

Tualatin, OR, October 2012 — LPKF Laser & Electronics has announced it will exhibit at the 31st annual *MILCOM Military Communications Conference*, which takes place October 29–November 1 at the Gaylord Palms Convention Center near Walt Disney World in Orlando, Fla.

Situated in booth 130, LPKF will demonstrate its best-selling PCB milling machine, the ProtoMat S63. The ProtoMat S63 utilizes accurate, powerful stepper motors to mill away unwanted surface material, creating PCBs in a matter of minutes.

In-house PCB prototyping systems are ideal for setups where design data security is of the utmost importance. Additionally, LPKF is the only manufacturer that offers a complete line of SMT and finishing equipment. These two factors allow for complete user control over the entire prototyping process.

To learn more about LPKF's PCB prototyping equipment, stop by booth 130 at *MILCOM* or visit www.lpkfusa.com.
