LPKF Introduces Very Affordable Stencil Laser

Tualatin, OR, December 2008 – The new LPKF **Stencil Laser P 6060** is the most affordable stencil laser to date. This fully enclosed laser cutting system for the production of SMT stencils is the latest addition to the LPKF Stencil Laser family. The system uses a proprietary, light weight motion system that allows excellent positioning accuracy, while maintaining the highest cutting speeds in its class.

The **Stencil Laser P 6060** can cut all stencils, both framed and frameless, can be adjusted to fit any stencil size up to 29.1" x 37.4" (740 x 950 mm). The system requires minimum set-up and is ready to use within minutes of being plugged in. The stencil laser features a fiducial camera for automatic re-load of stencils, eliminating unproductive downtime. Engineered with a Class I laser safety rating the **SL P 6060** can cut with both compressed air and oxygen and features a simplified user interface with an easy-to-learn multi user level software. A small footprint and reduced energy consumption allows the system to be used in all environments. The **Stencil Laser P 6060** is easy to manage and maintain and LPKF's service staff can remotely service the system from anywhere in the world via the internet. "With an affordable price on the StencilLaser P 6060 placement of the system is possible where not economically feasible before, allowing for added capacity or even changeover from an older model!" noted Stephan Schmidt, President LPKF Laser & Electronics.

About LPKF

LPKF Laser & Electronics is an ISO-9001 certified equipment manufacturer of equipment for the electronics industries; the worldwide headquarters is located in Garbsen, Germany with the North American headquarters located in Tualatin, Oregon.
