LPKF Launches New Prototyping Line

Tualatin, Oregon, January 2011 – LPKF Laser & Electronics, the world market leader in in-house Rapid PCB Prototyping, announces the release of four new circuit board plotters. This is a revision of the best known product group: the ProtoMat® S-Series circuit board plotters, which were reengineered to work faster and more efficiently. Also being introduced is the new ProtoMat® E33 entry-level unit. At first glance the user will notice all S-Series ProtoMat's comes inside a new modern looking acoustic cabinet and has available upgrade options. With the new ProtoMat line LPKF continues its innovation efforts in circuit board prototyping.

All new systems come with the completely redesigned CircuitPro software by LPKF; aimed at a wider range of users. While inexperienced users are guided step-by-step through the production processes by finely tuned wizards; proficient users can continue using menu functions.

Britta Schulz, Vice President of the Rapid PCB Prototyping Division notes, "We have attained a superior level in affordable and easy-to-use PCB Prototyping equipment and offer the widest range in the market. Advances in technology allows each system to be upgraded and we will still continue working on new and existing prototyping equipment to meet ever changing needs."

About LPKF

LPKF Laser & Electronics is the world leading manufacturer of both mechanical and laser systems for the production of PCB prototypes, enjoying over 80% market share in the business segment. LPKF's worldwide headquarters is located in Garbsen, Germany and maintains North American headquarters in Tualatin, OR. More information is available at LPKF's website: www.lpkfusa.com
