**Rapid Prototyping of Printed Circuit Boards at Satellite 2015**

Tualatin, Ore., February 2015 — LPKF Laser & Electronics has announced it will exhibit at the Satellite 2015 exhibition, which takes place March 17-19 at the Walter E. Washington Convention Center in Washington, D.C. LPKF provides in-house rapid PCB prototyping systems for a variety of applications and will demonstrate the ProtoLaser U3, in booth 8133.

The ProtoLaser U3 is an ultraviolet laser system for processing printed circuit boards. Winner of a SMT Vision Award, the ProtoLaser U3 can etch circuitry, drill holes, and depanel PCBs all in a single step.

In-house PCB prototyping provides several benefits outsourced prototyping does not, including the ability to rapidly fabricate PCB design iterations. It also allows the user to maintain complete control over design data.

For more information on in-house PCB prototyping, visit LPKF in booth 8133 at Satellite 2015 or visit [http://www.lpkfusa.com/protolaser/pl\\_u3.html](http://www.lpkfusa.com/protolaser/pl_u3.html).

**About LPKF**

Established in 1976, LPKF Laser & Electronics manufactures milling machines and laser systems used in circuit board and microelectronics fabrication, medical technology, the automotive sector, and the production of solar cells. LPKF's worldwide headquarters is located in Hannover, Germany and its North American headquarters resides near Portland, Ore.
