**LPKF Webinar Explores New Laser Plastic Welding Technology**

Tualatin, OR, October 2012 — LPKF Laser & Electronics will present the webinar *Transparent Laser Plastic Welding* Thursday, November 15, 2012 at 11 a.m. PST. This new webinar focuses on a groundbreaking development in laser plastic welding technology. To register, visit <https://www3.gotomeeting.com/register/856232662>.

With the introduction of transparent laser plastic welding, the need for special absorbers to bond clear polymers has been negated. The implications for this development are significant, especially for those in the medical device manufacturing industry.

Presented by Josh Brown and Shane Stafford, the webinar will run less than an hour in length and will include a breakdown of the science behind transparent laser plastic welding, material selections, and potential applications.

Design engineers, mechanical engineers, and quality control engineers are all encouraged to participate. For more information, visit [www.lpkfusa.com/webinars/](http://www.lpkfusa.com/webinars/).
